

this multiple time zone issue in indiana is completely unacceptable. i live in the eastern time zone and work in central time zone at NSWC Crane. It is unbearable that i have to leave work early in order to pick up kids for the babysitter. this time zone difference is increasing my cost of living in indiana since my only other option is to increase the amount of time i use a babysitter. if i leave work at the "regular" time it is incredibly late by the time i get home. the working man and the businesses i frequent where not considered in this current situation. matt
